Centre for Marine CNG to Host 4th International Forum

(St. John's, NL, Canada) – The world's first research and development corporation for large-scale marine transportation of compressed natural gas is scheduled to host more than 100 industry leaders from around the world at the 2007 International Marine CNG Forum, October 30th – 31st at the Fairmont Hotel in St. John's, Newfoundland & Labrador, Canada.

The 4th annual International Marine CNG Forum is the pre-eminent gathering of stakeholders within the marine CNG industry bringing together oil & gas, shipping, regulatory, scientific, technology proponent, class society and government leaders for dialogue on innovation and emerging issues within the global marine CNG community.

This forum on current advances, trends, and innovation will feature speakers that include an award-winning author and teacher Dr. Thomas Homer-Dixon, Hart Publications editor-in-chief Dr. William Pike and EnerSea Transport Managing Director, Paul Britton, accompanied by more than 20 others.

“The Centre is proud to host this world class event to help facilitate the growth of our industry. The caliber of speakers and delegates that we have attracted is a clear indication of the growing importance of the Centre in the development of Marine CNG transportation,” said Managing Director, Michael Hanrahan.

Registration is available through the Centre's web site at www.cmcng.com
